BELGIUM.
Report 2013.

Economic crisis means cut in public expenditure.

It is, of course, also true in healthcare.

No spectacular measures but a spray of insidious decisions that affects principally hospitals and specialists.

General practice is more or less spared.

Moreover, regionalization of the Social Security is under way and nobody knows in what kind of nonsense it shall end.

Liability without fault operates since a few months but no assessment is available at this time, especially to answer that question: who, finally, pays??

Aesthetic medicine has now an institutional framework.
