Protest of AEMH doctors for all victims of catastrophic wars

AEMH doctors cannot and should not remain indifferent towards the recent phenomenon of unjust wars in many continents which are causing tremendous casualties among civilians and destroying many moral values of the human life.

As doctors we are destined to help and maintain the human physical and mental health and to alleviate the human suffering.

Also we have the moral and deontological obligation expected of human beings to fight against the phenomenon that plague all humanity, especially at this time.

The recent situation creates war and reinforces terrorism and after a few years many countries shall be in war because of the situation.

The principle of new EU constitution is to "to respect human life and not deprive anyone from it".

We are asking that we as European from the world society and international organisations and medical European institutions and authorities to exercise all their influence and power in order to terminate all catastrophic and unjust wars.
