Memorandum of Understanding

For

European Medical Organisations

The European Medical Organisations reaffirm their commitment to promoting the highest quality of medical education, training and practice, the self-regulation of the medical profession, as well as appropriate working conditions for all doctors including their mental health, to enable the best possible health and healthcare for every patient in Europe. With this Memorandum of Understanding all organisations endorse their shared understanding of the importance of these objectives.

The undersigned European Medical Organisations shall seek to coordinate their activities and will undertake joint action where suitable. This shall concern in particular:

- Providing access to representatives of other European Medical Organisations to working groups, events and meetings.
- Inviting other European Medical Organisations to join and endorse policies/statements/position papers.
- Identifying policy topics for joint action (discussion, preparation of statements, consultation, communication and outreach to policy-makers) under the lead of one organisation with the opportunity for all organisations to opt-in
- Coordinating dates of meetings and events

The coordination shall not restrict the individual organisations' range of activities. In case of endorsed documents it shall remain clear which organisation originates and coordinates the content.

The presidents of the European Medical Organisations shall seek to meet four times a year or whenever necessary. These meetings shall determine among others, policy topics for joint action.
